Floor lamp SYDNEY F01062WH AG

Modern, all-purpose.
LED lighting of SYDNEY lamps (SMD) is currently the most modern solution used in the design of impressive decorative lamps. Small dimensions, high brightness (Sydney emits a luminous flux of 1260 lm) and energy efficiency are the most important features of SMD LEDs. They give a nice, evenly diffused and bright light.
This lamp gives an exceptionally original lighting, thanks to the horizontal directing of light directly to the dome lined with delightful, thin flakes of silver metal. The outer part of the dome and the base are in matt white, while the rest is chrome-plated.
